Profile Summary

Bangladeshi graduate student of data science, with one year of full-time professional experience in full-stack web development. Polyglot programmer, problem solver, team player. Adept at developing high-performance cloud-native web applications using ASP.NET Core and MERN-stack. Proficient in building solutions with machine learning and deep learning frameworks. Currently looking for a part-time, contract, or casual employment in the IT industry.

Education

- **Macquarie University** — Sydney, NSW, Australia
  Master of Data Science — *February 2020 – May 2022*
  Coursework: Data Science, Big Data, Machine Learning
- **North South University** — Dhaka, Bangladesh
  Bachelor of Science in Computer Science and Engineering — *January 2014 – August 2018*
  Capstone project: Fruit Image Classification Using Convolutional Neural Networks
  Coursework: Artificial Intelligence, Theory of Fuzzy Systems, Software Engineering, Microprocessor Interfacing & Embedded System, Computer Graphics

Work Experience

- **Dynamic Solution Innovators Ltd.** — Dhaka, Bangladesh
  Junior Software Engineer — *February 2019 – January 2020*
  Full-time employment working on Node.js-based full-stack (React.js and Hapi.js) web applications: the OpenCRVS project, and the enterprise solution of Olwel, a healthcare startup. Agile methodology (scrum) was followed.
  Responsibilities: Added features and components; fixed bugs; optimized API calls and database queries; wrote database migration scripts; wrote unit tests. [View the commits for OpenCRVS on GitHub here]
- **North South University** — Dhaka, Bangladesh
  Research Assistant — *November 2016 – April 2018*
  Part-time employment under the Department of Environmental Science and Management. (relevant news article)
  Responsibility: Developed the front-end software (Windows Forms) of NODES, an airline management system.

Technical Skills

- **Programming languages**: C#, JavaScript (ES6), TypeScript, Python, C, Java, C++, R
- **Web development**: ASP.NET Core, Entity Framework Core, SignalR, Blazor, Node.js, Express.js, Hapi.js, Nest.js, React.js, Next.js, Vue.js, Angular (2+), Webpack, PWA, ReST, GraphQL, Socket.IO, Microservices architecture
- **Machine learning & data science**: Jupyter Notebook, NumPy, Pandas, NLTK, Scikit-Learn, ML.NET
- **Desktop app development**: Windows Forms, WPF, UWP, Electron.js, JavaFX
- **Database systems**: MongoDB, MySQL, Microsoft SQL Server, PostgreSQL, SQLite, RethinkDB
- **DevOps**: Docker, Heroku, Azure App Service, MongoDB Atlas, basic CI/CD

Personal Projects

- **KonSchool**: Fuzzy-AHP-based recommendation system for secondary schools in Bangladesh. – ASP.NET Core, Docker, MongoDB [GitHub • Azure • Heroku • Docker]
- **Connery**: Fruit-image-classifier using convolutional neural networks. – ML.NET, ASP.NET Core [GitHub • API Swagger]
- **AddLicenseHeader**: A CLI tool that adds a license header on top of source files. – .NET Core [GitHub • NuGet package]
- **Vardict**: A basic Node.js package for parsing labeled CLI arguments. – Node.js, TypeScript [GitHub • NPM package]
- **Prospect**: An app for reading the latest posts from popular coding blogs. *WIP* – Node.js, TypeScript, React.js, Next.js, Nest.js, PostgreSQL, GraphQL, Docker [GitHub]
